Proceedings (Mathematical Sciences)

Volume 97, 1987

SUBJECT INDEX

Approximate identity
On an approximate identity of Ramanujan 313
Arithmetic Siegel modular functions
On the proof of the reciprocity law for arithmetic Siegel modular functions 21
Asymptotic behaviour
On an approximate identity of Ramanujan 313
Automorphic cuspidal representations
On Whittaker models and the vanishing of Fourier coefficients of cusp forms 67
Automorphic representation
On the nonvanishing of some L-functions 117

Basic hypergeometric series
On some generalizations of Ramanujan's continued fraction identities 31
Bounded covolume
On the set of discrete subgroups of bounded covolume in a semisimple group 45

Character ring
The states of the character ring of a compact group 305
Class numbers
Traces of Eichler–Brandt matrices and type numbers of quaternion orders 189
Commutative rings
On endomorphisms of degree two 179
Compact group
The states of the character ring of a compact group 305
Composition of quadratic forms
On endomorphisms of degree two 179
Conjugacy class of endomorphism
On endomorphisms of degree two 179
Continued fractions
Hypergeometric series and continued fractions 277
Cusp forms
On Whittaker models and the vanishing of Fourier coefficients of cusp forms 67
Cuspidal class group
The Manin–Drinfeld theorem and Ramanujan sums 251

Deligne's generalization
The states of the character ring of a compact group 305
Dilogarithm function
On an approximate identity of Ramanujan 313
Discrete subgroups
On the set of discrete subgroups of bounded covolume in a semisimple group 45

Eichler–Brandt matrices
Traces of Eichler–Brandt matrices and type numbers of quaternion orders 189
Eisenstein series
The Manin–Drinfeld theorem and Ramanujan sums 251
Elliptic curves
On the supersingular reduction of elliptic curves 247
Estimation of area
The area within a curve 111
Euler's phi function
Fluctuations in the mean of Euler's phi function 239
Exponential sums
On exponential sums involving the Ramanujan function 157
Approximation of exponential sums by shorter ones 167

Fluctuations
Fluctuations in the mean of Euler's phi function 239

(GL_n, GL_m)-duality
(GL_n, GL_m)-duality and symmetric plethysm 85

Hadamard–Vallee Poussin method
The states of the character ring of a compact group 305
Hardy–Ramanujan formula
Multiplicative properties of the partition function 297
Hecke-algebra
The Hecke-algebras related to the unimodular and modular group over the Hurwitz order of integral quaternions 201
Hurwitz order
The Hecke-algebras related to the unimodular and modular group over the Hurwitz order of integral quaternions 201

Hypergeometric series
Hypergeometric series and continued fractions 277
Almost poised basic hypergeometric series 61

Invariants
(GL_n, GL_m)-duality and symmetric plethysm 85

L-function
On the nonvanishing of some *L*-functions 117
Lattice points
The area within a curve 111
Lobachevsky space
Poincaré series for $SO(n, 1)$ 231
Lost notebook
Hypergeometric series and continued fractions 277

Mean value estimate
Fluctuations in the mean of Euler's phi function 239
Metaplectic group
On the nonvanishing of some *L*-functions 117
Modular curve
The Manin–Drinfeld theorem and Ramanujan sums 251
Modular forms
On Ramanujan's modular identities 263
Modular functions
Hypergeometric series and continued fractions 277
Modular group
The Hecke-algebras related to the unimodular and modular group over the Hurwitz order of integral quaternions 201
Multiplicative independence of integers
Multiplicative properties of the partition function 297

Non-congruence subgroups
The Manin–Drinfeld theorem and Ramanujan sums 251
Non-uniform lattices
Poincaré series for $SO(n, 1)$ 231

Partition congruences
On Ramanujan's modular identities 263
Partition function
Multiplicative properties of the partition function 297
Plethysm
(GL_n, GL_m)-duality and symmetric plethysm 85
Poincaré series
Poincaré series for $SO(n, 1)$ 231
Poised series
Almost poised hypergeometric series 61
Polynomials
On prime representing polynomials 75
Primes
On prime representing polynomials 75
q-continued fractions
On some generalizations of Ramanujan's continued fraction identities 31
q-series
Hypergeometric series and continued fractions 277

Quaternion orders
Traces of Eichler–Brandt matrices and type numbers of quaternion orders 189
Quaternions
The Hecke-algebras related to the unimodular and modular group over the Hurwitz order of integral quaternions 201

Ramanujan sums
The Manin–Drinfeld theorem and Ramanujan sums 251
Ramanujan τ function
On exponential sums involving the Ramanujan function 157
Ramanujan's modular identities
On Ramanujan's modular identities 263
Ramanujan-type approximations
Explicit Ramanujan-type approximations to pi of high order 53
Reciprocity law
On the proof of the reciprocity law for arithmetic Siegel modular functions 21
(GL_n, GL_m)-duality and symmetric plethysm 85
Recursive approximation to pi
Explicit Ramanujan-type approximations to pi of high order 53
Relative trace formula
On the nonvanishing of some *L*-functions 117
Rogers–Ramanujan continued fractions
On some generalizations of Ramanujan's continued fraction identities 31
Rogers–Ramanujan identities
On an approximate identity of Ramanujan 313

Selberg–Kloosterman zeta function
Poincaré series for $SO(n, 1)$ 231
Semisimple group
On the set of discrete subgroups of bounded covolume in a semisimple group 45
Siegel ϕ-operator
The Hecke-algebras related to the unimodular and modular group over the Hurwitz order of integral quaternions 201
Siegel space
On the proof of the reciprocity law for arithmetic Siegel modular functions 21

Supercuspidal representation
The characters of supercuspidal representations as weighted orbital integrals 3
Supersingular reduction
On the supersingular reduction of elliptic curves 247
Symmetric plethysm
(GL_n, GL_m)-duality and symmetric plethysm 85

Tensor products
On endomorphisms of degree two 179
Three-term relations
Hypergeometric series and continued fractions 277

Unimodular group
The Hecke-algebras related to the unimodular and modular group over the Hurwitz order of integral quaternions 201

Waldspurger result
On the nonvanishing of some L-functions 117
Weighted orbital integrals
The characters of supercuspidal representations as weighted orbital integrals 3
Whittaker models
On Whittaker models and the vanishing of Fourier coefficients of cusp forms 67
